## Annual School Meeting

Most of the school districts in the community held their annual meeting on Saturday when the annual reports of the trustees were presented and a school trustee was elected.

The following officers were elected by the various districts:

Grand Centre S.D.:  
Trustee: Mr. M. S. Charlton.  
Secretary: Mr. H. W. Wait.  
Rosebud S.D.:  
Trustee: Mrs. Doras Wilson.  
Secretary: Mrs. Grace Imm.  
Gore S.D.:  
Trustee: Mr. E. Cullen.  
Secretary: Mr. Max Archer.  
Mona S.D.:  
Trustee: Mr. B. A. Atkinson.  
Secretary: Mr. Eric Atkinson.  
Napoli S.D.:  
Trustee: Mr. O. Aussenhus, Jr.  
Burnside S.D.:  
Trustee: Capt. Page.  
Secretary: Mr. C. Marden.  
Clovermont S.D.:  
Trustee: Mr. E. Tuggle.  
Secretary: Mr. C. F. Rennie.  
Melvin S.D.:  
Trustee: Mr. A. Wahl.  
Rugby S.D.:  
Trustee & Secretary: Mr. Wallace Hughes.  
Zella S.D.:  
Trustee & Secretary: Mr. J. B. Worthington.

## Alberta To Pay 18% On Two Million

Exchange Discount on Loan to Cost Province \$600,000 in New York

Obligations that the province of Alberta will have in the New York money market Friday, when a debenture issue for \$3,000,000 will mature, will be safely taken care of, it is announced by Premier J. E. Brownlee. The premier said that satisfactory arrangements have been completed by which an extension has been made on \$1,000,000, and the balance will be taken up.

Exchange discount on \$2,000,000 will cost Alberta \$600,000. Particulars as to how the latter part of the transaction has been arranged are not being given out at present, but the Premier says that a statement will not doubt be made to the legislature when it meets.

Exchange on the \$2,000,000 that will be taken up cannot be avoided, and the deal is being put through at a rate of 18 per cent.

## Anglican Church Annual Meeting

The annual meeting of St. Stephen's Church was held at the home of Mr. and Mrs. Roger Barrett on Friday evening last, with Rev. R. K. Trowbridge in the chair.

The financial report of the church was presented by Mr. J. D. Thomas; the report of the W. A. by Mrs. J. H. Lowe, and the report of the Sunday School by Mrs. H. D. Booker. All the reports were accepted.

Mr. E. K. Pratt was re-appointed Rector's Warden and Mr. J. D. Thomas was re-appointed People's Warden.

The following were elected on the vestry: Messrs. H. D. Booker, W. Pitt, W. R. Hartley, J. Scrutton, R. Barrett, H. Goehring, J. Rupp, H. Welch, A. Orde, W. M. Smith.

It was decided to organize an Anglican social club in place of the Y. P. A., and the first meeting will be held at the home of Mrs. J. H. Lowe in the near future.

After the meeting, a social evening was held and a delightful supper served.

Succeeding R. W. Ward, H. S. Patterson, K. C. was unanimously elected president of the Calgary Conservative Association, to hold office during the second term since the party was elected to power in Canada more than a year ago.

Word has been received of the death of Mrs. C. G. Medler, at Belknap, Washington, after a short illness. Mrs. Medler was a former resident of Didsbury.

## Weekly Sermonette.

"Don't nose around too much. You are your brother's keeper, but not his bookkeeper."

## Coming Events

Ramon Novarro in "Daybreak" at the Opera House Monday and Thursday next week. Don't fail to see this star in another masterpiece.

The postponed annual meeting of the local U. F. A. will be held in the old United Church on Friday, Jan. 15th at 2 p.m.

Hospital Hard Time Dance on Friday, January 29th.

## LOCAL & GENERAL

Mr. E. G. Ranton was a Calgary visitor on Sunday.

Mr. Al. Russell spent Saturday in the southern city.

Misses Dorothy and Nelda Hugst were Calgary visitors on Saturday.

Mr. Abner Hunsperger shipped a carload of calves to Calgary Tuesday.

Jack Currie went to Three Hills this week, where he will relieve at the Jenkins' store for a short time.

There will be service at Bethel Evangelical Church, Westcott on Sunday afternoon at 2 o'clock.

Mr. Pete Miquelon, of Olds has taken Chas. Cook's position as assistant at the local C.P.R. depot. Charlie is still in town and is assisting at the Westdale municipal office.

At Zion Evangelical Church, the sermon-subject for Sunday morning, January 17th at 10:30 will be: "Behold the Man." In the evening at 7:30: "The Christian's Standard of Conduct."

If you have anything you don't need, we can sell it for you. Bring in your surplus goods. Someone is continually calling for the things you've got.—W. H. Chamberlin's Secondhand Store.

The annual meeting of Knox United Church and congregation will be held this Sunday (Jan. 17) for the purpose of reception of reports, election of officers and other relevant business.

The matron and nurses of the Didsbury Hospital will give a hard time dance at the Opera House on Friday, January 20th. Proceeds of this benefit dance will go towards purchasing an electric sterilizer for use in the hospital.

"Huckleberry Finn," Mark Twain's classic of fun and adventure will be shown at the Opera House tonight, (Thursday) January 14th, those juvenile stars, Jackie Coogan & Mitzie Green in the feature roles. This picture will be thoroughly enjoyed by both young and old.

The Rebekahs' whist and bridge drive held in the Oddfellows Hall on Monday night proved to be one of the most successful social functions held this season. All the tables were full and the players seemed to have an enjoyable time. The prizewinners at bridge were: Ladies, Mrs. McCloy; Gents, Mr. Ross Ford. Prizewinners at whist: Ladies, Mrs. I. Klein; Gents, Mr. H. O. Tordjman. Supper was served after which dancing was indulged in. Mrs. Cliff Bolony supplying the music. The members of the Rebekah Lodge are delighted with the support they received.

## Red Cross Drive.

The drive for produce, etc. staged by the local branch of the Red Cross Society proved a wonderful success.

A very hearty response was made to the society's appeal, and many cases of distress have already been alleviated owing to the generosity of the farmers and others.

It is an impossibility to thank individually all those who contributed, and the society, through the courtesy of the Didsbury Pioneer, takes this opportunity of expressing sincere thanks and appreciation to one and all. Contributions were far beyond expectations, which was most gratifying, especially in these hard times.

Special credit is due to Mr. A. R. Kendrick for organizing the drive, and working so hard to make it a success. The society also extends its gratitude to the following men who furnished and drove trucks: Messrs. C. H. Adshad, C. Broder, Sam. C. Brown, Jarr. R. Brocker, H. Goehring, Fisher & Edwards, H. Shantz, H. E. Pearson, I. Weber, J. Hoesgood, H. Hoesgood, A. H. Snyder, H. Morton, and those men who accompanied the trucks: Rev. Harder, Rev. Mitchell and Rev. Wood; Messrs. R. Barrett, H. W. Chambers, J. McDougall, F. W. Leeson and W. A. Austin.

The toys donated by the Builders' Hardware were very much appreciated by the kiddies, and Mr. M. Weber's donation of Resubud Pancake Flour is being enjoyed by the children in the Junior Red Cross Hospital.

## Boy Gets Reward.

Just before leaving for his home at Camrose on Friday evening, Mrs. P. J. Berg discovered she had lost her pocket book. Inside were cash and papers, the book contained diamonds to the value of \$600.00.

Warren Matheson found the missing book in front of Snider's store and at once reported his find to Constable Kercher.

On being notified of the find, Mrs. Berg rewarded the boy with \$15.00 for his honesty.

Mrs. Sexsmith returned last week and from her recent visit with her daughter, Mrs. B. Robinson, at High River.

## Obituary.

DAVID TRAUB.

David Traub was born in Lehigh County, Pennsylvania on April 25th, 1842 and departed this life from the home of his son, Alvin Traub at Didsbury, Alberta, January 8th, 1932 at the age of 89 years, 8 months and 14 days.

At the age of 21 years, deceased came from Pennsylvania to Blair, Ontario, where he was united in marriage in 1865 with Hannah Giddman, to which union were born eleven children, four daughters and seven sons. He was preceded in death by his wife, one daughter and two sons.

Mr. Traub was one of the early pioneers of Didsbury, homesteading a few miles north-east of town in the spring of 1898. For the last number of years he had made his home with his son, Alvin in Didsbury.

Our departed brother became a Christian when a young man, and has lived a life of devotion to his Lord and Master since that time. For many years he has been a faithful member of the M.B.C. Church.

He leaves to mourn his loss: three daughters, five sons, thirty-one grandchildren and twenty-one great-grandchildren, and many friends and neighbors who will miss him from their midst.

## Ordination of Elders, Knox United Church

In the presence of a large congregation, Dr. J. L. Clarke and Mr. C. W. Gibbs were solemnly set apart to the eldership of Knox United Church, Didsbury.

The ceremony, which was performed by Rev. A. J. Mitchell, assisted by Elders H. W. Chambers and W. Morton, was an exceedingly impressive one. The Sacrament of the Lord's Supper was afterwards observed, when twenty new members were received into fellowship.

## Weekly Joke.

### Peace On Earth

As the Christian nations of the world again prepare to observe the anniversary of the birth of Christ the thoughts of their peoples are impressed anew with "the glad tidings of great joy" with which the herald angels announced the coming of the greatest event in the history of mankind, the precursor of "peace on earth, goodwill toward men." So it is as Christmas approaches that we dwell upon thoughts of home, and peace, and friendship and goodwill, and seek to banish from our minds old enmities and ill-will.

Nevertheless, to many it will appear as if "peace on earth" is still a vision of the future, an ideal that may some day be realized, if and when the Christian nations of the world realize the inconsistency of their attitude in maintaining huge armaments where to wage war upon each other.

Christmas with its thoughts and ideals of peace can be made to serve the great purpose this year, perhaps to a greater extent than ever before, of cultivating a "will to peace" among people in general. Until there is such a strongly ingrained will to peace, there will be, and can be, no permanent peace, no permanent security against the horrors and destruction of war.

There is in evidence in many quarters a tendency to sharply criticize and condemn the League of Nations as ineffective and timid in its handling of the crisis that has arisen to a greater extent than ever before, of the League has always had its enemies, while others have been lukewarm in its support, often proving more of a handicap than a help to the League in its efforts for world betterment. In practically every impending crisis that has loomed upon the international horizon since the League was established, some newspapers and public men have denounced the League as a failure.

Yet the League has survived and has been the instrument through which more than one impending open conflict has been averted. Even in the present Manchurian crisis, notwithstanding the clashes which have taken place, can any fair and open-minded citizen doubt that, had there been no League of Nations, a sanguinary war would now be raging in Asia with all the dire probabilities that it would spread and engulf Europe and possibly provoke another world disaster.

The League is not perfect. It cannot always attain to its highest ideals. It cannot always achieve everything it desires. The difficulties which confront it, and the problems which it must solve, are prodigious. Even should it utterly fail on some one occasion to prevent war, and such failure has not yet been recorded against it, it would not necessarily mean the end of the League, nor that its efforts were wholly futile.

The League of Nations is the great clearing house, the arbitration court of the world's international difficulties. As such it is deserving of the support of all peace-loving people of all nations. Instead of being critical of its efforts and its achievements where they do not prove 100% efficient, all peace-loving people should be boosters and enthusiastic supporters. Destroy the League and the world would be thrown into chaos, with the one great restraining influence of an impartial international character removed, and the proponents of the gospel of force given a free hand to promote their evil designs.

As the world progresses towards greater enlightenment, to better understanding between all nations, to an abandonment of narrow nationalism in favour of true internationalism, and the League is bending its efforts in these directions, so, too, will the League itself grow and develop into an ever increasingly useful factor in world affairs and as an influence for peace. Something better than the League is at present conceivable and governed will ultimately take its place when the nations are prepared to support that better organization. In the meantime every Canadian should be an ardent League of Nations supporter. They should demand that their Government continue to support the League actively, and do so in a moral way, an intellectual way, in a financial way.

And this year as we sing "Peace on earth, goodwill toward men" may we sincerely mean what we sing, and may our song be a re-statement of our belief in and support of the one great peace organization that arose out of the war which we were told, and which we fondly hoped was true, was a war to end war.

### Were Clever Surgeons

Swedish Doctors Performed Delicate Operations 3,000 Years Ago

As far back as 3,000 years ago delicate brain operations were performed by Swedish surgeons, according to Professor Otto Rydbeck, in Lund, the old university town of Southern Sweden. The professor stated that fourteen of fifteen skulls found in Swedish soil show marks of trepanations by Stone Age surgeons. In the parish of Skivard the skeleton of a man of 3,000 years ago, showed that he had been operated on to remove a parasitic infection on the brain. The operation, which had not been performed by boring, but by scraping off the bone, had evidently been quite successful, since it was evident that the patient lived for many years afterwards.

California bakers have introduced bread from seaweed.

### Eclipse Aided Columbus

Seared Natives Of Jamaica Into Supplying Needed Provisions

The eclipse of the moon on March 1, 1504, proved of much service to Christopher Columbus. Being off the island of Jamaica, and short of provisions, which the islanders refused to supply, he threatened to punish them by depriving them of the moon's light. At first his threat was treated with indifference, but when the eclipse itself began, the natives, terror-struck by the apparently supernatural powers of the great Spanish commander, immediately collected provisions for the fleet, and thereafter treated their visitors with profound respect.

Douglas' Egyptian Liniment is especially recommended for spider or infection of cow's teat. Invaluable also in cases of sprain, curbs, and splints.

### Cannot Be Lied

A man may lose his business, his home, his stocks, his bonds, his real estate, his automobile and even his membership in a golf club, but if he does not lose his integrity and his courage and his determination to carry on, he is not and cannot be lied.

### Sleigh and Auto

Ontario spends half a million dollars keeping its roads clear of snow in winter, and one-tenth of that amount, says the St. Catharines Standard. The sleigh is still the chief mode of winter transportation in Quebec.

### Demand For Graded Beef

Red Marking For Choice Grade and Blue For Good

Just over two years the Canadian Government Department of Agriculture introduced a policy under which choice or good beef sold by retail butchers could be identified by a red or blue indelible mark on every cut—the red for choice grade and blue for good. Only beef which has passed Federal inspection from a health standpoint can be branded. The sale of this quality beef has exceeded the most sanguine expectations of the promoters of the policy. Government officials began at the opening of 1901 to check up on the sale of the branded beef, after allowing a period of 15 months as an experimental stage. In January, 1931, the total number of pounds of red and blue branded beef sold was \$87,000. By July the sales were nearly 2,600,000 pounds. It is estimated that 15,000,000 pounds of branded beef have been sold in Canada this year and more cattle have been sold in the Dominion for branded beef than have been exported to the British market.

Not all eligible beef is branded, the amount of branding done by various plants being more or less according to existing orders from the trade and as well in part, to expectation of demand during the following week or so. In this connection it is interesting to note that in recent months meat packers have quite often found themselves short on supplies, as a result of a strong steady pick-up in demand during the following week or so. In this connection it is interesting to note that in recent months meat packers have quite often found themselves short on supplies, as a result of a strong steady pick-up in demand during the following week or so.

In certain areas there are producers' organizations which have a definite policy with the production of beef eligible for branding as the main objective. The consumer preference for branded beef is being reflected back to the producer and is stimulating better feeding. The demand for suitable cattle has, throughout 1931, been a sustaining factor on the market, and in view of the fact that there will be a very liberal supply of cattle grain-fed during the coming winter it is likely that demand for graded beef will play an important part in the spring and summer markets.

### Recipes For This Week

(By Betty Barclay)

#### BELLIED CARROTS AND PEAS

- 1 package lemon-flavored gelatin.
- 1 cup boiling water.
- $\frac{1}{2}$  cup vegetable stock or cold water.
- $\frac{1}{2}$  teaspoon salt.
- $\frac{1}{2}$  teaspoon paprika.
- 1 cup cooked carrots, diced.
- 1 cup cooked peas.
- 2 tablespoons vinegar.

Dissolve gelatin in boiling water. Add vegetable stock, vinegar, salt, and paprika. Chill. When slightly thickened, fold in carrots and peas. Turn into molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

#### RIBBON SANDWICHES

- Sandwich bread.
- Sorgum butter.
- Sweet pickle relish.
- Mayonnaise.
- Pimento-cream cheese.

Slice bread in slices  $\frac{1}{2}$ -inch thick. Spread first slice generously with softened butter, then with sweet pickle relish moistened with a little mayonnaise. Cover with a second slice of bread, moistened on both sides. Spread the second slice with mashed pimento-cream cheese. Top with third slice of bread. Press slices firmly together. Remove crusts. Wrap in a damp cloth and place in refrigerator under a heavy weight for several hours. To serve slice very thin and serve immediately.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath has familiar evidence of a chronic trouble, cannot doubt Dr. D. L. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under severe conditions. It is not a hurried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Eleven plants in Canada produced in 1930 over 95,500,000 pounds of wire nails and spikes. The Dominion exported during the year 3,585,000 pounds of nails and imported 1,663,000 pounds.

### National Research Council

Plans Made For Further Improvement of Canadian Wool

Attended by representatives of both manufacturers and producers of wool and delegates from various Canadian universities, the annual meeting of the National Research Council's associate committee on wool was concluded recently at Toronto. Marked by a general readiness to co-operate in solution of the problems facing the industry, the meeting authorized the continuation of plans for further improvement of Canadian wool.

Results from experiments designed to develop a type of sheep suited to western range conditions were deemed so satisfactory, the committee decided to assemble the wool from three of the four provinces, compare it with fleeces obtained from similar strains in other countries, and then follow it into a Canadian manufactured product.

### GOVERNMENT HOUSE, OTTAWA

The Christmas Seal Sale of the Canadian Tuberculosis Association, of which we are Patron and Patrons, has our warmest support.

The struggle against the spread of tuberculosis is one in which every good citizen is concerned, for there is no disease that has more deadly effects on the health of a nation, its prevention and its cure call for unceasing vigilance and expense.

The Canadian Tuberculosis Association has played a noble part in this struggle, and evidence of its work may be seen in all parts of the Dominion. That work has brought health and strength to thousands and has averted from many other thousands, especially children, what is perhaps the most insidious of all the dangers to which the human race is exposed.

We ask those who can, to show their appreciation of what the Association is doing by helping this Christmas to make the result of the Christmas Seal Sale even more successful than it was last year.

### Value Of Fish Meal

Use Is Steadily Increasing As A Basis For Livestock

Dr. Frank T. Shutt, Dominion Chemist, in discussing the nutritive value of fish meal states, "The use of fish meals in the rations of all classes of live stock and especially in those for pigs and poultry is steadily increasing. These meals may, perhaps, be regarded primarily as sources of protein, but the fat, the mineral content and the iodine are also constituents of very considerable value in stock feeding." He points out also that cod fish meals must be made from fresh fish. The flesh of the fish is the most valuable source of protein, while the mineral content is highly valuable.

### Romance of Gold

Sketch of Development of Industry in British Columbia

In the lure of gold which took men past the narrow frontiers of a trading post colony, was the genesis of British Columbia's greatness. Dale L. Pitt, president of the Mining Association of British Columbia and general manager of the Premier mine, told the annual meeting of the Canadian Institute of Mining and Metallurgy and Mining association of British Columbia. Developing his theme Mr. Dale took his audience back into the last century and showed how mining in British Columbia had led to opening up of new country, development of roads and railways.

Mr. Dale, following the mining industry from its inception in British Columbia, touched on some of the romance and pointed to the remarkable influence it had exercised, not only on the province, but on the Dominion. From the nugget found by an Indian woman on Queen Charlotte islands, and the few color prospectors panned on the Thompson River, the industry rose through the pioneer era with all its romance, its wealth and its disappointments; thence to the development of lone mining with its building of mills and smelters and railroads. Next came the more recent days when science and skill manifested itself in the development of modern ore dressing, smelting and refining so that man could take from the earth nature's immense precious metals, and by its ingenuity, coupled with capital's ability to build huge plants, gave us wealth never dreamed of before.

An excellent protection against storms can be got in Miller's Worm Powders. They render the stomach and intestines untenable to them. They heal the surfaces that have been inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health-giving.

A British scientist estimates that an earthquake of just average size generates heat equal to that produced by burning more than 3,000 tons of coal.

## May Replace American Coal With Canadian Mine Products As Result of Exhaustive Tests

Results of widespread and exhaustive tests of Nova Scotia and British Columbia bituminous coal indicate the feasibility of replacing with the Canadian product a large tonnage of American coals at present utilized, it was stated by John McLeish, director of the mines' branch of the Dominion government. Mr. McLeish has just returned from the conference on bituminous coal held in Pittsburgh, Pa.

This subject received considerable attention from the Canadian delegates to the conference and the committee had the benefit of expert tests of representative samples of Nova Scotia and British Columbia soft coal. The tests were carried out in the low temperature carbonization retorts of the Illingworth company, in Pontyfridd, Wales; in the experimental laboratories of the research council in Ottawa; in the ovens of the Winnipeg Electric company, and of the Montreal Coal Manufacturing company.

All tests showed that a highly satisfactory domestic fuel could be produced in this manner. It was stated by Mr. McLeish, in this connection, that already about 60 per cent. of the total coal requirements of the Winnipeg Electric company are being obtained from Michels, B.C., while the Montreal company is trying out a large quantity of Nova Scotia coal.

The sessions in Pittsburgh also gave attention to the hydrogenation and liquefaction of coal. Mr. McLeish said that the research council had for some time been engaging the services of an engineer on small scale tests of the application of commercial high pressure hydrogenation technology to crude shale oil, bituminous sands, and low temperature coal tar oils of Canadian origin. It had already been proven, he said, that it was possible to produce motor fuel and gasoline from these substances.

### Lord Reading's First Case

Was Lost Because Defendant Refused To Eat the Evidence

The Marquis of Reading began his career by losing his first important case in court.

He was briefed to defend a fruit merchant, sued by a street trader, who alleged that he had been sold a consignment of bad figs. Roused by Mr. Rufus Isaacs's cross-examination, the plaintiff swept aside legal objections and challenged "Try some of 'em yourself, then, and if they don't make you sick I'll give 'em."

The judge backed the suggestion, but Mr. Isaacs murmured that the proper person to make the test was the defendant.

"What'll happen if I refuse?" whispered the merchant, anxiously.

"Judgment will be given against you," said Mr. Isaacs.

"Then," said he, decisively, "I'd rather lose."

### The Difference

"Dad, what is a traitor?"

Leader of Political Party. A traitor, my son, is one who leaves our party and goes over to the enemy.

"And what do you call a man who leaves the other party to come to us?"

"A convert, my son."

Germany has managed to work herself into an impenetrable position. When the collector comes to the door he is promptly bitten by the wolf.

"Well, lovely daughter of the mountain, are you watering the cattle?"

"Yes. Are you thirsty?" Meggen-dorfer Blaetter, Munich.

W. N. H. 1919

### Work Is Preferred

Many People on Relief Would Welcome Job With Small Wage

The young man who had been squeezed out of a job by a merger of competing companies looked across the desk of an acquaintance and declared: "I'm too proud, I guess, to go to a social agency or an emergency committee to ask for money to tide me over until I make another connection. What I want is not financial aid, not even friendly counsel, but real work that is worth paying for."

The friend to whom the remark was made was impressed with the reasonableness of the young man's point of view, and when he met with a relief committee somewhat later succeeded in changing the method of extending help to folk temporarily out of employment.

A canvas was undertaken to find jobs and positions some of them only part-time and entailing a small wage. In many instances, opportunities for useful work about town were made out of whole cloth—new jobs to repair tottery street-lighting posts, to point old buildings, tidy up the parks and the municipal golf course. The money which once went directly to the needy was now transformed into actual wages for work performed, so that men no longer considered themselves recipients of charity.

One of the human factors which needs to be considered in the present crisis is the preserving of the worker's self-respect, the strengthening of his morale and his courage to go forward. A job which calls for the expenditure of his energies and capabilities, and which yields some financial recompense, is probably a sure stay in time of difficulty than a mountain of well-meant sympathy, or an order for free groceries and coal signed by the entire staff of some emergency committee.—Christian Science Monitor.

### Plant Trees

"Plant trees as fast and as hard as you can" is the advice of Frank J. D. Barnum, internationally famous authority on water conservation and afforestation, in a letter to Hon. J. F. Bryant, K.C., chairman of the commission on drought in Saskatchewan. Mr. Barnum is a wealthy man, who devotes all his time to his subject. He is chairman of the committee on afforestation, appointed at the last Imperial conference.

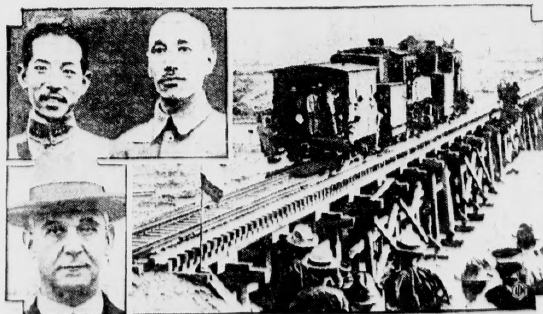

He states in part: "Drought conditions in California are just as bad as they are in Saskatchewan. In planting roadside trees there, they have to lay water pipes for great distances in order to water the trees they plant, otherwise they would not live."

Of course, there is nothing else you can now do except to plant trees as fast and as hard as you can, and as you have asked my advice on this subject, I can only say Plant and keep on planting, as it is absolutely the only ray of hope for your province."

Hawaii's population is now 375,211, an increase for the year of nearly 5,000.

"The clinging type of girl is going out." The boys will keep taking her.

### REPAIR OF THIS BRIDGE COST 250 LIVES

The Kiangching River Railway bridge of the Taonan-Aganchi line, following its repair by the Japanese forces now in Manchuria, after the Chinese soldiers and engineers had failed to fix it. The first engine to cross the bridge since its destruction is shown. The repair of the span cost 250 lives. The repair was done by Chinese firing on the Nippon repair gang and Japanese troops retreating on the Chinese. In the upper left, Marshal Chang Hsueh-Liang (left), deceased Manchurian Governor, and President Chang Kai-Shek, the Nationalist leader, are depicted. If fighting comes, President Kai-Shek is expected to lead a United Chinese army against the Japanese. Lower left is General C. P. Summerall, former United States Chief of Staff, whom it is expected by our neighbors in the South, may be a member of the international commission which the League of Nations is suggesting as a solution of the Manchurian crisis.

## Study Of Recently Formulated Schemes For The Prevention Of Drought In Western Canada

(By S. Barnes, Dominion Experimental Station, Swift Current)

A study of recently formulated schemes for the prevention of drought in western Canada fails to give the assurance that their adoption would appreciably lessen the harmful effects of drought.

Two schemes for drought prevention have received much prominence in the press. Tree planting on a huge scale is advocated, and also the storage of water in reservoirs. Both schemes, it is alleged, will add moisture to the air and thereby induce a normal rainfall.

Meteorologists are suspicious of any scheme to promote rainfall since so many of these schemes have failed. The effect of trees inducing a normal rainfall can be easily determined. It is proposed to plant 1,000 square miles of trees. These trees, it has been stated, will transpire each month 20 billion gallons of water in vapor form, or a total for a period of six months of 200 million tons of water. These are impressive figures but the area of land to be benefited is also large. The drought area is given as 30,000 square miles or 31,200,000 acres. The 200 million tons of water distributed over this area would give a rainfall of slightly more than fifteen hundredths of an inch, scarcely enough to lay the dust, and it would take six months to get it.

The possibilities in the reservoir idea are about as equally encouraging. The total evaporation of water for a six months period on the prairies is approximately 50 inches.

The average water surface of a number of reservoirs is given as 35 acres. If we assume the possibility of increasing the natural rainfall by one inch in a six months period, it would be necessary to construct some 50,000 dams.

Both of the above schemes entirely overlook the influence of the natural factors which produce rain. Rain is produced from vapor present in the air, but the mere presence of moisture in the air is no assurance of rain. What is to happen when the wind blows, as it sometimes does on the prairies? It is quite conceivable that the vapor arising from the trees and artificial lakes in Saskatchewan may be wafted into Manitoba, or even wander off to relieve a drought in Oklahoma or Texas. The bulk of Saskatchewan's rainfall, it should be remembered, originates in the Pacific ocean at least one thousand miles away.

For several years experiments on soil moisture, the fundamental factor in drought prevention, have been conducted at the Dominion experimental station at Swift Current, Sask. At the same time inquiries for information on methods of overcoming drought have been directed to points throughout the world where drought is experienced. Many common theories regarding soil moisture have been dispelled and evidence has been disclosed of important details

upon which present knowledge is very meagre. There is no evidence to indicate that drought in western Canada is in any way connected with the system of farming practised or is steadily becoming worse. On the contrary the present agricultural practices, the outcome of many years of practical experience, are fundamentally sound in that they are designed to make the greatest possible use of the available moisture supply. The experimentalist is now faced with the task of still further increasing their efficiency, and in this way to evolve a means of drought prevention built upon a thoroughly practical and scientific basis.

### World's Grain Show

To Be Held at Regina July 24 to August 20, 1933

Meeting at Toronto recently the national committee of the World's Grain exhibition and conference to be held in Regina, Sask., adopted July 24 to Aug. 3, 1933, as the dates for the event. The committee heard the optimistic report of J. A. Mooney, managing director of the exhibition, and adopted the financial statement for the year.

It was reported all the countries, states and provinces which had arranged to take part in the exhibition when the date was originally set for 1932, had signified their intention of participating in 1933. Rice from the Philippines is already stored in Regina awaiting the exhibition and an exhibit of wheat from India, Central India, is on its way. Fifty or sixty of the world's greatest grain experts have agreed to give addresses at the conference.

"The experience gained by some of the provinces during the past two years, and the excellent progress made, should be an incentive to those provinces in the future," and Mr. Mooney. He suggested that every advantage be taken of the year for preparation, as the result of the postponement announced some months ago, so that Canada would occupy at the exhibition of 1933 the position that the quality of her agricultural products merited. He said the exhibition organization had played an important part in giving assistance to the agricultural industry of Canada.

### Our Agricultural Wealth

A statement issued by the Dominion Bureau of Statistics estimates the gross agricultural wealth of Canada for 1931 at \$7,373,559,000. Of this \$687,225,000 was represented by live stock and \$24,852,000 by poultry and game, a total of \$712,077,000. The estimated gross annual agricultural revenue for 1930 was \$1,240,470,000. Farm animals sold contributed \$106,630,000; wool \$2,311,000; dairy products \$277,154,000; poultry and eggs \$55,227,000; a total of \$2,641,322,000 directly from live stock and animal products.

### Well To Remember

Bread was slow to follow the drop in price of wheat, bakers arguing that four was after all a small item in the ultimate cost of bread. The argument should not be forgotten in a rising market.

One danger to which the modern girl will not expose herself is that of catching her fingers in a clothes wringer.

"I wonder how men can tell so many lies?"

He: "It is because you women ask so many questions."—Kasper, Stockholm.

### CHAPTER VIII

#### The Man From Montevideo

Jean arrived in London with a good three hours to spare before the Western Express, by which she proposed to travel to Devonshire, was due to leave Waterloo Station. She elected, therefore, to occupy the time by touring round the great, unknown city of her dreams in a taxi-cab, and spent a hectic hour glancing the Abbey and the Houses of Parliament, and the old, grey, misty river that Londoners love, and dismissing in and out of the shops in Regent Street and Bond Street with her hands full of absurd, expensive, unnecessary purchases only because this was London and she felt she just simply must have something English at once, and wandering up with a spin through Hyde Park, which didn't impress her very favourably in its winter aspect of leafless trees and barren stretches of sodden grass.

When she drove to a hotel, and her luggage deposited there to await her departure, her thoughts turned very naturally towards lunch. Her scamp round London in the crisp, clear, frosty air had converted the recollection of her early morning coffee and roll into something extremely, and nervous and unsupporting, and it was with the healthy appetite of an eager young mind in an eager young body that she faced the several courses of the table d'hôte.

She glanced about her with interest, the little sketches of English conversation which drifted to her from other nearby tables giving her a patriotic thrill of pure delight. These were typically English people lunching in a typically English hotel, and she, hitherto a stranger to her own mother-country, was doing likewise. The knowledge filled her with delicious satisfaction.

Now were English people at home in their own country—anything like as dull and dowdy as Glen Tormarin's sweeping criticisms had led her to expect. The men were immensely well-timed and well-looking. She liked the "morning-tail" appearance they all had; it reminded her of the Englishman at Montevideo. Apparently it was a British characteristic.

The women, too, fitted her with a species of vicarious pride. They were so well turned-out, with a slim, long-lined grace of figure she found admirable, and with splendid natural complexion skins like rose and ivory.

Two of them were drifting into the room together now, with a superb cool assurance of manner—rather as though they had bought the hotel—which brought the sleek head-waiter automatically to their side, bowing and obsequious.

Somewhat to Jean's satisfaction he conveyed them to the table next her own, and she was pleasantly conscious, as they passed her, of a suggestive whisper of silk and of the faint fragrance of violets subtly permeating the atmosphere.

Try Lydia E. Pinkham's Vegetable Compound

Has her natural skin shown? Take Lydia E. Pinkham's Vegetable Compound. It cures those headaches—headaches that make her nervous, irritable and grumpy.

Has her natural skin shown? Take Lydia E. Pinkham's Vegetable Compound. It cures those headaches—headaches that make her nervous, irritable and grumpy.

Conscious that perhaps she had been manifesting her interest a little too openly, she turned her attention to a magazine she had bought en route from Dover and was soon absorbed in the inevitable happy-ever-after conclusion of the story she had been reading.

"Lady Anne! Oh, she lives at Staple now. Didn't you know?"

The speaker's voice was clear and resonant, with the peculiar carrying quality which has replaced in the modern Englishwoman of the upper classes that excellent thing in woman which was the proud beast of an earlier generation.

The conjunction of the familiar words "Lady Anne" and "Staple" struck sharply on Jean's ears, and almost instinctively she looked up.

As she stirred, one of the women glanced indifferently in her direction, then placidly resumed her conversation with her companion.

"It was just after the smash-up," she pursued glibly, "Blaise Tormarin rushed off abroad for a time, and the news of Nestor's death came while he was away. Poor Lady Anne had to write and tell him of it."

"Rather ghastly," commented the other woman, "I never heard the whole story of the affair. I was in Paris, then, and it was all over—barring the general gossip of course!—by the time I returned. I tried to run out of Lady Anne's house, but she was so close as my oyster."

Both women talked without lowering their voices in the slightest degree, and with that complete indifference to the proximity of a stranger—almost exhibited by a certain arrogant type.

Jean, realizing that it was her father's friends who were under discussion, and finding herself forced into the position of an unwilling audience, felt wretchedly uncomfortable. She wished fervently that she might in some way arrest the conversation. Yet it was clearly as impossible for her to lean forward and say: "You are talking about the people I am on my way to visit," as it would have been for her to put her fingers in her ears. So far nothing had been said to which she could actually object. Her feeling was chiefly the offspring of her super-sensitive fear that she might learn from the lips of these two gossiping women, one of whom was apparently intimately acquainted with the private history of the Tormarin family, some little fact or detail which Lady Anne might not care for her future guest to know. Apart from this fear, it would hardly have been compatible with human nature—certainly not feminine human nature—to have not felt picked to receive considerable personal interest in the topic under discussion.

"Oh, it was a fool business," the first woman rejoined, settling down to supply the details of the story in an air of rapacious satisfaction which reminded Jean of nothing so much as of a dog with a bone. "Nestor Freyne was a typical Italian—though her father was English. I believe all blazing, passionate eyes and other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can be taken internally."

"The other was a fool business," the first woman rejoined, settling down to supply the details of the story in an air of rapacious satisfaction which reminded Jean of nothing so much as of a dog with a bone. "Nestor Freyne was a typical Italian—though her father was English. I believe all blazing, passionate eyes and other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can be taken internally."

The other woman laughed, dismissing the tragedy of the little tale with a shallow tinkle of merriment. "Oh, well, I've only met Blaise Tormarin once, but I should say he was not the type to relish being thrown over for another man!" She peered short-sightedly at the girl sitting on her plate, poking at it discontentedly, and then in the Tormarin's. "I never think they cook their fish decently here, do you?" she complained.

And, with that, both women shelved the affairs of Blaise Tormarin and concentrated upon the variety of culinary items from which even expensive hotel chefs are not necessarily exempt.

Jean had no time to bestow upon the information which had been thrust upon her until she had secured the transport of herself and her belongings from the hotel to Waterloo Station, but when this had been satisfactorily accomplished, and she found herself comfortably settled in a corner seat of the Plymouth express, her thoughts reverted to her newly acquired knowledge.

It added a little definite outline to the very slight and shadowy picture she had been able to form of her future environment—a picture roughly sketched in her mind from the few hints dropped by her father.

She wondered a little if Glen Tormarin had omitted all mention of Blaise Tormarin's love affair and its unhappy sequel, but a moment's reflection supplied the explanation. Peterson had admitted that it was ten years since he had heard from Lady Anne; presumably, then, the circumstances just recounted in Jean's hearing had occurred during those knowledge she had gathered rather detached from the prospective journey of her visit to Staple. Judging from the comments which she had overheard, her host was likely to prove a somewhat morose and gloomy individual, soared by his unfortunate experience of feminine fidelity.

Thence her thoughts vaulted widely ahead. Most probably, as a direct consequence, he was a woman-hater, and if so, it was more than possible that a couple regard her presence at Staple as an unwarrantable intrusion.

A decided qualm assailed her, deepening quickly into a settled conviction—Jean was nothing if not thorough—that the real explanation in the delay in Lady Anne's response to Glen's letter had lain in Blaise Tormarin's objection to the invasion of his home by a strange young woman—over whom Lady Anne had had no voice, or, despite to ignore, before she could answer Glen's request in the affirmative.

(To Be Continued.)

longings from the hotel to Waterloo Station, but when this had been satisfactorily accomplished, and she found herself comfortably settled in a corner seat of the Plymouth express, her thoughts reverted to her newly acquired knowledge.

It added a little definite outline to the very slight and shadowy picture she had been able to form of her future environment—a picture roughly sketched in her mind from the few hints dropped by her father.

She wondered a little if Glen Tormarin had omitted all mention of Blaise Tormarin's love affair and its unhappy sequel, but a moment's reflection supplied the explanation.

Peterson had admitted that it was ten years since he had heard from Lady Anne; presumably, then, the circumstances just recounted in Jean's hearing had occurred during those knowledge she had gathered rather detached from the prospective journey of her visit to Staple. Judging from the comments which she had overheard, her host was likely to prove a somewhat morose and gloomy individual, soared by his unfortunate experience of feminine fidelity.

Thence her thoughts vaulted widely ahead. Most probably, as a direct consequence, he was a woman-hater, and if so, it was more than possible that a couple regard her presence at Staple as an unwarrantable intrusion.

A decided qualm assailed her, deepening quickly into a settled conviction—Jean was nothing if not thorough—that the real explanation in the delay in Lady Anne's response to Glen's letter had lain in Blaise Tormarin's objection to the invasion of his home by a strange young woman—over whom Lady Anne had had no voice, or, despite to ignore, before she could answer Glen's request in the affirmative.

(To Be Continued.)

Nation-Wide Fame. There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved to be one of the world's most efficient remedies for sore throat, lumbago and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can be taken internally.

New Use For Ice

Invention May Be Valuable In Fighting Sunken Submarines.

A new device sponsored by a Swiss company is expected to prevent ships from sinking by freezing incoming water at the point of entry in damaged hulls. A special refrigerating apparatus working under pressure with ammonia is placed over breaks in the hull. Through the resultant formation of ice the opening is obstructed and the ship is rendered comparatively safe. The invention is expected to be especially valuable in raising sunken submarines.

A safe and sure medicine for a child troubled with worms is Mother's Own Worm Exterminator.

Made Fresh Premise

There are times that not only men's patience but their good resolutions. One such time in the Tormarin's pastor that he would give 25 cents to the church missionary fund every time he said "damn." But times have been hard and "damn's" frequent. So the man went to his pastor and said: "Father, this is getting to be a nuisance. How much will you take for a season's ticket?"

An average man would soon attain perfection if he followed the advice he hands out to his neighbors.

## China As Usual For World Cruisers

"Franconia's" Purser Gives Intimate Glimpse Of Cruise Life

Despite the current troubles in Manchuria, arrangements are being made as usual for the entertainment of the "Franconia's" world cruise passengers in the Chinese capital next spring. The great cruise liner will call at Chingwangtiao on April 10th from which port her passengers will visit Peimin and the Great Wall of China.

Enthusiastic tribute to the excellence of Chinese railways, comfort on trains, good cuisine in the dining-cars, efficiency of train operation, was paid by T. H. Cullum, purser of the "Franconia," who is proceeding to New York to rejoin his ship for his seventh cruise around the world. "The visit to China is always a delightful revelation to our cruise passengers. They are surprised at the great comfort of the hotels in cities like Peking and Tientsin, and the courteous reception everywhere in China."

An interesting episode of journeying across Siberia from Vladivostok instead of crossing the Pacific home ward, is offered to the "Franconia's" passengers. The trip takes 20 days from Japan, and the great trans-Siberian Railway (now so much in the public eye), including stop-over at Harbin and Vladivostok, is included. An interesting variation of the cruise itinerary is the famous "circuit" of the world by airplane. Bagdad and Babylon, over the strange ruins of ancient civilizations.

Through a unique motor-ride to the celebrated and incredible temple of Angkor, in Bangkok and on to Saigon, the Paris of the Far East.

But Bali, in the Dutch East Indies, is the high-spot of the cruise, according to T. H. Cullum. Here all the exotic charms of the East have been expertly efficiently by the Dutch, and recognized as ideal conditions.

It is an unforgettable experience to watch the Bali temple dancers perform their strange dances of subtle rhythms and curious music. The "Franconia" was the first big ship to call at this out-of-the-way outpost of civilization.

Being purser on the great cruise liner is an elaborate programme of entertainment for passengers while at sea includes, tournaments, various games, calisthenics, contests, movies and lectures. Besides a cruise director with several assistants, there is a complete educationist on board in the person of Dr. C. B. Batchelder, of Boston, who gives morning lectures while at sea, on the history, geography, and general characteristics of each place to be visited. He also gives the advice on how to get the most out of each projected visit, what best to wear, and so on. In general, he acts as adviser "par excellence." After each place visited, he projects buttoned-up notes to serve as "memory pictures," before proceeding to lecture on the next place to be visited. The most out of each point visited.

Many people imagine that the heat experienced during a world cruise must be terrific. But Purser Cullum claims that he has never felt as much discomfort anywhere in all his travels as he has experienced in New York city during typically hot American summers. In the "Franconia," New York on a frozen January day, the cruise liner soon runs into the Gulf Stream, heading for mild Madeira. Throughout January, the liner is cruising the warm Mediterranean where light clothes are all that are needed.

The hottest part of the voyage is between Suez and Manila. People begin to wear whites in the Red Sea. Evening clothes are of the lightest material; the men wear a sort of white mess-jacket with a "Kamander" around the waist, and ordinary evening dress trousers. Many passengers purchase their tropical kit in Bombay where prices are very low. They have themselves measured when the ship arrives and, when their Indian tour of nine days concludes at Bombay, all their clothes are ready waiting for them. "Palm Beach" clothes, silks, and tropical cottons, are ready for them. They have all the best, particularly in Japan and China.

Lightly heavy tweeds, a heavy overcoat, and a raincoat, are also necessary for visits to hilly districts in Japan and for crossing for crossing the Atlantic and Pacific in some parts.

Many people think that a world cruise is expensive, but, in actuality, it is often much cheaper to use the "Franconia" for six months as a palatial home, see the world in style, and live like a king, than to stay at

## EXCESS FAT IS A DANGER TO HEALTH!

Insurance companies are apt to reject applications of overweight men when they apply to take any risks.

Good health cannot long be maintained when there is excess weight. Fat is apt to shorten life, and, consequently, impaired mental activity, loss of energy and strength are but a few of many complaints which sometimes arise in overweight men and women.

Why not lose this superfluous fat—regain glowing health and good looks again—simply take a half teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast. Kruschen is the safe and healthy way to reduce, based on scientific principle. The purgative action of Kruschen can be speeded by eating out fatty meats, pastries, and going light on butter, cream and potatoes.

Kruschen helps blood, nerves, glands and body organs to function properly again—regain strength, new strength and energy—feel years younger—look better, and live longer, happier, more attractive and super healthy—without the Kruschen treatment to-day!

home. Lots of people spend more than the minimum fare of \$1,750, in five months, at home in America, declared Mr. Cullum. Extra expenses, if one is moderate in one's shopping, need not exceed \$500, but everything depends on one's tastes. Some passengers take the "Franconia" world cruise every year, because it is an actual economy and a real pleasure. One of my passengers has been around the world six times, another four, and several have done it twice or three times. Last year every passenger at my table had been around the world with us before."

## Little Help For This Week

"For ye have not received the spirit of bondage again to fear; but ye have received the Spirit of adoption, whereby we cry, Abba, Father."—Romans viii, 15.

O love, Thy sovereign aid impart.

To save me from low-thoughted care:

Chase this self-will through all my life.

Through all its latent mazes there:

Make me Thy dutiful child, that I

Needless may cry—Gerhard Terstegen.

What we need is the spirit of adoption, whereby we cry "Abba, Father."

Then there will be no more fear of neither fear of man, nor fear of God, nor fear of sin, nor fear of death, nor fear of what follows death. When we are God's children, living in our Father's house, according to Him, in peace with Him, with His love shed abroad in our hearts, then all fear is taken away; then our work is easy, our way onward. James Freeman Clarke.

Persian Balm—the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it soft and delicate. Cooling, refreshing, it is delightful to use. Never leaves a vestige of stickiness. (Fragrant for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended for roughness, or chafing caused by weather conditions.

Difficult For Communists

Reds Find It Almost Impossible To Meet In Cities

It's getting tougher and tougher for Communists in Canada, Jacob Penner, Communist candidate for mayor at Winnipeg, told an audience he was addressing in a public school.

"There is not a single town in the east where a meeting of this nature is possible," he said, "not in a public or private hall."

"And in the west, particularly in Moose Jaw, Calgary, Edmonton and Vancouver, even the unemployed are not allowed to assemble."

"Winnipeg is still one exception where the Communists can pour out their ideas to their heart's content," he declared, "but how long will this last?"

Nerves A Complete Wreck

Sat Up Half The Night

Mrs. John Rose, Bark Lake, Ont., writes: "I was troubled so much with my nerves I was a complete wreck."

I could not do my work, and would have to sit up half the night on account of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills.

I used one box, and got well, and by the time I had taken six boxes I was as good as ever."

MILBURN'S HEART AND NERVE PILLS

Price 50c a box

Bold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## Mountain View Notes

Some residents attended the bridge and whist drive given under the auspices of Cassandra Rebekah Lodge on Monday night.

Mr. and Mrs. Ellis Barnes and family, accompanied by Mrs. Ed. Barnes, were visitors at the home of Mr. and Mrs. Fry on Sunday.

The annual meetings of Gore, Mena and Neapolis Schools took place Saturday. At Gore, Mr. Ernie Cullen was re-elected to the office of trustee, while Mr. B. A. Atkinson is in again at Mena.

Members of the W.G.I.C. met at the home of Miss Evelyn Barnes on Saturday evening. The president, Miss Wilson was again present and final arrangements were made for commencing a quilt. After the business session, a social time was spent and greatly enjoyed by all. Lunch was served by Mrs. Ellis Barnes, the delicious ice cream being donated by Mrs. Ed. Barnes. The next meeting is to be at Miss Eileen St. Clair's on Saturday, February 6, at 2:30 p.m.

## Melvin Notes

Miss Ruth Johnston is nursing in Calgary.

Mr. and Mrs. Farrant spent Friday with Mr. and Mrs. Hoesgood.

Mr. and Mrs. Ernest Clarke and children spent Sunday with Mr. and Mrs. John Clarke.

Miss Gladys and Mr. Lennie Carlson were guests of Mr. and Mrs. A. Krebs on Sunday.

Mr. Eddie Schiawt, who has been visiting with Mr. and Mrs. A. Krebs, has gone to the coast for the winter.

Mrs. Hoesgood and Mr. Harvey Hoesgood spent Tuesday evening with Mr. and Mrs. John Clarke.

Miss Mildred Brown, of Airdrie visited with Miss Marion Johnston last week-end.

The Go-Gatters Club will open for the year 1932 with the annual meeting, Jan. 16th. A good turnout is requested.

A number of the young people attended the dance at Rugby on Friday night and report having had a good time.

Word was received that Mr. O. R. Swingle passed away on Friday, January 8th at Chilliwack, B.C. Much sympathy is extended to the family and relatives.

## Creamery Butter Production Higher

The 1931 Alberta creamery butter production showed an increase of 28 per cent. over that of 1930, according to figures issued recently by Dr. C. P. Marker, provincial dairy commissioner.

It reached a new peak in 1931 with 22,650,000 lbs., which exceeded by 320,000 lbs. the previous high mark registered in 1924 when production totalled 22,330,000 lbs.

Milk production, according to preliminary figures which are not yet complete, increased by 15 per cent. over 1930. Creameries in operation totalled 92.

The eight cheese factories in the province produced 1,000,000 lbs. of cheese.

The total value of dairy farm products is placed at \$15,750,000, of which \$1,530,000 is for creamery butter; \$115,000 for cheese, and the rest \$11,105,000 for other dairy products such as milk, butter, ice cream and other items.

Last year's total for all dairy farm products was \$18,675,000.

The average price for creamery butter for 1931 was estimated at 39 cents as against 28.64 cents for 1930.

Returns for the cream grading service for 11 months of 1931 show that the percentage of special grade cream was 45 per cent compared with 41 per cent. In 1930, this revealing a substantial increase in the quality of the product.

## Burnside Notes.

Mr. Sam McAllister was a Sunday visitor at Mr. Noah Eckel's.

Miss Margaret Rimer has returned to her home in Louisiana, after spending a month visiting Mr. and Mrs. Clarence Clipperty.

Mrs. George Saunders who has been spending a week with her mother at Lacombe, returned last week on account of the illness of her sister-in-law, Mrs. Will Saunders.

## Here and There

Annual value of forests products in Canada is placed around \$500,000,000 by the Canadian Government Forestry Service, and over 200,000 persons are employed in this work.

Total value of crude bullion gold in Ontario for the first two months of 1931 is placed at \$5,517,254 as compared with \$5,252,245 for the same period of 1930, an increase of nearly 25%. If this continues, all previous records of gold output are likely to be exceeded this year.

Position of president of the Boy Scouts Association of Canada has been offered to and accepted by E. W. Beatty, chairman and president of the Canadian Pacific Railway, whose interest in boy welfare has long been recognized all over the Dominion.

John Minard, section hand with the Canadian Pacific Railway for many years and pensioned at the age of 73, celebrated his 195th birthday April 2. He does not use glasses, eats well, sleeps well and enjoys life. He has no prescriptions for exceeding the century mark.

Sponsored by the Alberta Motorcycle Association, the Western Canada Motorcycle hill-climbing championships will be decided at Banff in the Canadian Rockies on May 24 and will be followed the same day by the Banff annual regatta.

A shipment of 800,000 salmon eggs has recently been forwarded to the Dominion Fish Hatchery at Flat Lake, Renfrew County to receive treatment prior to being deposited in the Nipistau River as a part of the 1931 programme for restocking New Brunswick fishing waters.

Canadians, from coast to coast, heard the voice of His Excellency the Governor-General and Rt. Hon. R. B. Bennett, prime minister of the Dominion, May 11, in endorsement of the work of the Canadian Red Cross through stations linked by the radio broadcast transmission system of the Canadian Pacific Railway Company's Telegraphs.

In the last analysis the railroad safety movement's success is traceable largely to teamwork. Each railroad worker is constantly reminded that safety is paramount. Safety practices have become habitual, therefore they do not lessen efficiency. Railroad passenger service is now more efficient as well as safer than ever before, says a prominent United States newspaper.

The new 6 1/2 hour service between Montreal and Toronto, both ways, which came into operation on Canadian Pacific lines end of April, has proved highly popular with travelers and heavy traffic on these trains is reported. Ottawa has also been brought half an hour closer Montreal and passengers for Quebec have had 15 minutes clipped from the time of the journey.
